Tamper Indicating Label Enquiry Form

All labels can be manufactured to your specification (limitations apply). Our minimum quantity is 100 labels (though more economical in higher volumes) and the main factors that affect price are:

1. **Stock type** – M11 is cheaper than M9 which has a full security rating and is used by defence departments, etc.
2. **Size** – The bigger the label, the higher the cost.
3. **Quantity** – The higher the volume, the cheaper the rate (A big factor)
4. **Number of Colours** – The more colours used, the more expensive label is to produce.

Note: Variable data has little impact on label cost as equipment used to manufacture labels is designed specifically to produce labels where information changes from one label to the next.

Below is the information we required when placing an order:

STOCK TYPE

Available in Silver only

- M11 - Works well – endorsed for some surfaces only
- M9 – Full security endorsement (SCEC)
- M7 – For plastic bags only (eg: evidence bags)

Used by defence and government departments around the world.

- Supplied on rolls _____ per roll
- Supplied as Flat Sheets

LABEL CONTENTS

- Standard (static data only)
- 1 Spot Colour _____
- 2 Spot Colour _____
- 3 Spot Colour _____
- 4 Spot Colour _____
- 5 Spot Colour _____

- Variable Data (1 or 2 of following colours only)
- Barcodes – Ideal for Asset Protection
(Barcodes best in red)
- Red
- Blue
- Black

Variable data is where the information changes on each label. Please attach variable data information as Microsoft Excel spreadsheet if possible. Please call for details.
